DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-12, 16, 18 to 26, 37 and 38 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The specification fails to enable one to determine which compounds other than those of claims 13 and 14 are intended to be able to inhibit enzyme mediated-cleavage of a polynucleotide substrate. The claims should be limited to those compounds for which there is support.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-12, 16, 18 to 26, 37 and 38 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The scope of the compounds intended to be used to inhibit enzyme-mediated cleavage of a polynucleotide substrate is unclear since the specification fails to teach one skilled in the art, which compounds other than those claimed in claims 13 and 14, would satisfy the requirements for the method.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 16 to 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Coates et al. Compositions containing the compounds of formula (B)(IBM) are taught by Coates. The instant compositions are considered to be obvious since no patentability can be seen for an old composition with a new use.

Claim Objections

4HK
2/12/03
Claims 13-¹⁵~~16~~ are objected to as dependent upon rejected claims.

Election/Restrictions

Claims 27 to 36 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 6.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references cited by applicants' are made of record.
